

THE KENTUCKY TRIBUNE.

News, Politics, and Miscellaneous Reading.

VOL. XI.

DANVILLE, KY., FRIDAY MORNING, NOVEMBER 4, 1853.

NO. 12.

POETICAL.

NOW-A-DAYS.

Alas! how everything has changed,
Since I was sweet sixteen,
When all the girls wore homespun frocks,
And aprons made clean;
With bonnets made of braided straw,
That tied beneath the chin,
The shawl laid neatly on the neck,
And fastened with a pin.

I recollect the time when I
Rode father's horse to mill,
Across the meadows, rocks and fields,
And up and down the hill,
And when our folks were out at work,
Assure as I'm a sinner,
I jumped upon a horse, bareback,
And carried them their dinner.

Dear me! young ladies, now-a-days,
Would almost faint away,
To think of riding all alone,
In wagon, carriage or sleigh;

And as for giving 'em their meals,
Or helping 'em to take,
O, saints! 'twould spoil their lilly hands,
Though sometimes they make cake.

When winter came, the maiden's heart
Began to beat and flutter,
Each bean would tell her sweet heart
Sleighbelring in a center.

Or if the storm was bleak and cold,
The girls and boys together,
Would meet and have most glorious fun,
And never mind the weather.

But now, indeed, it gives me much,
The circumstance to mention,

However kind the young man's heart,
And honest his intention.

He never asks the girls to ride,
In such a war is waged,
And if he sees her once a week,

Why, surely, they're engaged!"

From the Indian Advocate,
The Red Man's Home.

By DAVID LYRICK.

Child of the Forest, where's thy home?
The Red Man's home, I ask of thee?

Is it beyond the howling bourn?

Of your wretched, wretched son?

Is it where bends Pacific's waves,
Along Columbia's distant shores?

Or, where in its mountain caves,
Prolong old Ocean's solemn song?

Child of the Sun, whereon the orb
Is set, and hard to tear?

Our father's graves we heave them up,
Though we 'morn' but desolate.

But not when our old star has set,
Behind the clouds of yonder sea.

See of the wretched, wretched sons?

The Red Man's home for us,

We have a home, a home a stream—
We are a home in our blood of yore,
We have a home a stream—

The load we bear, we bear no more.

CUR SCRAP-BASKET.

Did we always do our duty by acting in accordance with the admonitions of the divine teacher within us, we should have few regrets.

A gentleman having presented his church with 'The Ten Commandments,' it was wittily said that he gave them away because he could not keep them.

Never marry a man who treats his mother or sister kindly or indifferently. Such treatment is a sure indication of a mean and wicked man.

What is the difference between a deserter and a hog-pen? Give it up? One flies from head-quarters, and the other is the head-quarters of fleas.

Never marry a stranger, or one whose character is not known or tested. Some females jump right into the fire with their eyes wide open!

If the speculator misses his aim, every body cries out, 'he's a fool,' and sometimes, 'a rogue.' If he succeeds, they besiege his door and demand his daughter in marriage.

Never marry a niggard, a close-fisted, mean, sordid wretch, who saves every penny, or spends it grudgingly. Take care lest he sweep you to death.

The man who 'couldn't contain himself,' was found, upon inquiry, to contain about a quart of the fluid extract of corn.

Never, on any account, marry a gambler, a profane person, or one who in the least speaks lightly of God or religion. Such a man can never make a good husband.

'Love your neighbor as yourself.' William Henry says he does, and more than ever, that, since Liz Jones lives in the next door.

Never marry a fop, one who struts about dandy-like, in his silk gloves and ruffles, with silver chains and rings on his fingers. Beware, there is a trap!

The less a man needs money, the more he worships it. Misers are always people with small appetites and no children.

'I'm next to the head.' You don't say so, Billy? How many are there in your class, my boy? 'Land Sd. Dean.'

This interesting little article makes just two lines—ahem.

S. Since writing the above, we have added three more, making in all exactly five lines—Plagstaff.

A man has been bound over for trial, in Boston, for defrauding the complainant of one dollar, by falsely pretending to be a lawyer. If every man who falsely pretends to be a lawyer, had his deserts, the jails of the country would hardly hold them.

It is not singular that the letters which spell the word *dear* are the initials of the words 'Dun Every Body Twice,' and the letters which spell *charter*, are the initials of the sentence, 'Call Regularly Every Day—I'll Trust.'

MISCELLANEOUS.

For the Kentucky Tribune,
Civil Liberty and Literature.

It is only of late years that the subject of literature, especially in its relations to civil liberty, is beginning to attract the attention it deserves. In regard to the importance of promoting general intelligence in the community, much has been said and written; but the subject in its general tendencies has scarcely been broached, and that in a superficial and one-sided manner. Some regarding it as the chief preservative of our civil and religious rights, have gone to extremes in speaking of the conservative power of an advanced literature. That an intelligent nation is better able to govern itself than an ignorant one, that a spread of knowledge is an important acquisition in a republic, we will pretend to doubt; yet the history of the world proves, that the most advanced national literature, of itself, cannot preserve our liberties, however much it may contribute thereto, when supported by other agencies and influences.

The Republic of Greece had to contend with various and formidable hindrances, some of which, such as the invasion of Greece by Xerxes the Great, only served to unite them in one undivided bond, and elicit their national pride and heroism. And, being freed from imminent danger from without, they enjoyed the most favorable opportunities for cultivating the mind, enjoying a genial and exhilarating climate, a clear sky, and a beautiful landscape, alternating with hill and vale, woodland and mead, land and water, they found everything calculated to inspire the mind with poetic thought and that inner fire which arouses men to eloquence; whilst luxuriant nature afforded appropriate and beautiful forms to set forth their glowing conceptions, nigh, too, by a language at once capable of expressing every shade of thought, rich, smooth, musical, mellifluous, and deep, they soon delighted in the productions of their native spirits. The most chaste, beautiful, and symmetrical statutory met them at every step—The aspiring youth of Athens would crowd the Academic groves to listen to the teachings of her philosophers, to hear the recitations of her historians, or to be excited to orgies by the inspiration of her poets. Soon Greece became the centre of learning, sending forth her radiance influences to other countries, and from every part of the world men flocked to Athens, to learn wisdom as well as do homage to the Grecian muse.

But in what relation did the acknowledged literature of those stand in view of her liberty? and what influence was exerted by the former upon the latter? Perhaps the inquiry can best be answered by reference to the period when Philip of Macedon attempted to subdue the liberties of Greece, and especially to subdue the Athenians. At the very time when the greatest power the world over knew, aroused the slumbering energies of the Grecian purity, and thenceforth did his overwhelming plottings against the oppressor of his country, the Greeks at once became a prey to many a crow. The whole affair originated in a mistake. He who begged to be conducted to L——, who was busily engaged in saturating the third handkerchief in a vain attempt to stop the red current that still persisted in oozing from his victim's nose.

Sare, I sell soon shew you we I mean—I mean to flag a you—I mean to shew a you, very much, and soiting the action to the word, he pinched into his antagonist; and before the bystanders could separate them had badly dislocated poor L——'s shirt collar, and drawn a copious flow of claret from his nose. By dint of persuasion and force combined, however, he was finally seated in front of the car, surrounded by a number of peace-makers, who after much difficulty, succeeded in convincing him that he was sorry there was nothing for him, as the land did not yield but half a crop, which he had taken for his half.

Sir, said L——, rising from his seat in evident indignation, 'what do you mean? How dare you apply the word pickpocket to me?' Sare, I sell soon shew you we I mean—I mean to flag a you—I mean to shew a you, very much, and soiting the action to the word, he pinched into his antagonist; and before the bystanders could separate them had badly dislocated poor L——'s shirt collar, and drawn a copious flow of claret from his nose. By dint of persuasion and force combined, however, he was finally seated in front of the car, surrounded by a number of peace-makers, who after much difficulty, succeeded in convincing him that he was sorry there was nothing for him, as the land did not yield but half a crop, which he had taken for his half.

THE TRIBUNE.
DANVILLE, K.Y.,
Friday, November 4, 1853.

"THE OLD DOMINION."—Richard Hildreth closes the chapter on "Knowledge" in his new work entitled "Theory of Politics," with the observation that "there were more ideas in the head of Thomas Jefferson alone, than in all Virginia at this moment."

A Texas paper tells of a precious boy at San Antonio, who attempted to vote at the recent election, but his youthful appearance caused a slight suspicion, and he was challenged. It was then discovered that he was but thirteen years of age, notwithstanding he has a wife and child over one year old. He was married at the age of eleven.

UNCLE SAM'S FARMING OPERATIONS.—The last census showed that Uncle Sam is a thrifty farmer. The value of the crops of the United States for 1850, were as follows: Wheat, \$143,000,000; Indian Corn, \$391,200,000; Hay, \$19,275,000; Oats, \$70,840,000; Potatoes, \$73,125,000; Cotton, \$129,000,000; the whole crop being \$1,762,585,042. The animals slaughtered are worth \$183,000,000 per annum.

TURNED UP.—The last Maysville Express states that Ben Rowan Hardin, who was reported to have been killed on the Isthmus some two or three years ago, it seems has turned up alive, and is somewhere in the South, his baggage having been sent home with letters to his family.

A call for a meeting of the mechanics and members of the bar, irrespective of party, appears in the New York papers, for the purpose of publicly expressing their sentiments at the "unparalleled outrage perpetrated by the Administration in removing the collector of our port on the simple ground that he would not allow himself to be used as a party tool."

THE Democratic Republican General Committee of New York, have appointed a committee to "draft suitable resolutions expressive of the indignant sense of the national democrats in regard to the removal of Mr. Bronson, in consequence of his refusal to become the tool of Van Buren, Marcy and company.

FACT NOT TO BE SNEEZED AT.—We were informed that there is in Cincinnati one drinking and eating saloon, which netus its proprietor, annually, bigger wages than those given to the Governor of the State, and all the Judges of the courts in Cincinnati, and a great deal more than all the Editors of the city press combined, would have the conscience to ask. Rum and vintuks are great inventions for bringing down the dimes.—Cincinnati Columbian.

IN PALMYRA.—A letter from Palmyra, Mo., dated Friday of last week, says:

Last night at 2 o'clock the Post Office and all the frame houses on each side—eight in number—were burned to the ground. No letters can be obtained. I believe yesterday's mail from the East was saved. There is quite an excitement in town, and much sympathy for the sufferers. No one injured.

The Maysville Express, of Wednesday last, says:

The depressed state of the money market has embarrassed, to some extent, our railroad operations. The Maysville and Lexington Railroad Company have been compelled to suspend work on some portions of the route, but they express a determination to complete the work this winter from Maysville to Elizabethtown, and from Lexington to Millersburg. The work upon the tunnels will also be kept up.

Hogs.—The Lebanon (Ky.) Post of October 26, says:

A few weeks ago hogs could have been and were engaged at \$250, in this country; now they are in demand at \$4. What the result of this will be, remains to be seen. It, at least, has the tendency to make pork high in the country, at killing time, whether the prices keep up there after in the market or not. We heard the other day, that Mr. James Schooling engaged 5000 hogs of Mr. D. E. Ray, at \$4.50. If this is not up in the pictures, we do not know what is.

Some one thus sums up a few of the advantages of modern inventions:—"One boy, with a Fournier machine, will make more paper in a twelvemonth, than all Egypt could have made in a hundred years during the reign of the Ptolemies. One girl, with a power press, will strike off books faster than a million scribes could copy them before the invention of printing. One man, with an iron foundry, will turn out more utensils than Tubal Cain could have forged, had he worked directly to this time."

A BAD PROSPECT.—It is announced on actual computation of some industrious, and, perhaps, dry reporter in New York, during the first year of the existence of the Metropolitan Hotel, its consumption of wine was nearly seventy thousand bottles. This would only make two hundred bottles a day—one to every four parsons of the house. From this we might properly infer that it will be some days yet—at least several—before the Maine Law can be executed in the commercial Metropolis of America.

An article in a late number of the Boston Atlas gives some interesting facts in relation to the destruction of vessels belonging to the United States, deduced from the marine reports and other sources. It appears that for a period of eighteen months, ending in September of the present year, 102 ships and barges, 744 brigs, and 327 schooners were totally lost at sea. During the same period, 59 vessels which had previously sailed were never heard from; 338 put into port in distress, and 102 were passed. This says the writer, is a total loss for the given period one every 22 hours; one stranded every 33 hours, one abandoned every 75 hours, and one never heard from every 10 days.

Patent Office Report for 1852. These elaborate reports from the Patent Office are gratifying indexes of the general industry of the country. The one for 1852 is full of valuable and interesting information. There were 2,633 applications received for patents during the year, and 4,020 patents issued. An application is rarely disposed of without being examined at least twice, and sometimes six times. Probably these 1,020 patents have cost 7,000 examinations. This is the largest number ever granted in one year, except during the first year of Gen. Taylor's Administration, when Commissioner Ewbank issued 1,076. Extensive additions have been made to the Patent Office buildings, and there is still a want of space.

Professor Renwick's Examiner's Report explains the principles of the celebrated Hobbs' lock. Its "unpickability" depends upon a secondary or false set of numbers, which prevent the instruments used in picking from reaching the real ones. Moreover, the lock is powder-proof, and may be loaded through the key-hole and fired off until the burglar is tired of his fruitless work, or fears that the report of his explosions will bring to view his experiments more witnesses than he desires.

Doors and shutters have also been patented that cannot be broken through with either pick or sledge-hammer. The burglar's "occupation's gone."

The caloric ship is described and commented at some length, but the report admits that its end is not yet fully attained.

A harpoon is described which makes the whale kill himself. The more he pulls the line the deeper goes the harpoon.

An ice-making machine has been patented, which goes by a steam engine. In an experimental trial it froze several bottles of ice the size of a cubic foot when the thermometer was standing at 80 deg. It is calculated that from every ton of coal put into the furnace it will make all the present century.

The Porte says: "Morally, Russia is already defeated, and that she will be so materially."

A man who had made some slight improvement in straw cutters took a model of his machine through the Western States, and after a tour of eight months returned with \$40,000. Another had a machine to thresh and clean grain, which in fifteen months he sold for \$60,000. A third obtained a patent for a printer's ink, refused \$50,000 for it, and finally sold it for \$60,000. These are ordinary cases, while such inventions as the telegraph, the planing machine, and the India rubber patent are worth millions each.

Twenty-seven harvesters, fifteen plows, twenty-six seed planters, eight threshing machines, ten corn-hullers, and three horse rakes have been patented during the year, in addition to those now in use.

Six new saw mills, seven shingle splitters, and twenty new planing machines have been patented within the year.

Seven new machines that spin, twenty that weave, and seven that sew are also patented.

Examiner Lane's report describes various new electrical inventions. Among these is an electrical whaling apparatus, by which the whale is literally "shocked to death." Another is an electro-magnetic alarm, which rings bells and gives signals in case of fire or burglars.

When the Czar heard that Turkey had declared war fell into a fury and swore that he would wage a war of extermination against the Turks.

Omer Pascha has notified the Russian commander to clear out from the Principalities before the 25th inst., or he would commence hostilities.

It is not supposed that the fighting will commence on the Danube, but in Gorgona or the Black Sea.

Old General Paskiwitch takes command of the Russian army in the Principalities.

The combined fleets were observed on the 10th preparing to advance to Constantinople.

There is an invention that picks up pins from a confused heap, turns them all round, with their heads up, and sticks them in papers in regular rows. Another goes through the whole process of cigar making, taking in tobacco leaves and turning out the perfect article.

One machine cuts out cheese; another scores knives and forks; another blades boots; another rocks the cradle; and seven or eight take in washing and ironing.

There is a parlor chair patented that cannot be tipped back on two legs, and a railway chair that can be tipped back in any position without any legs at all.

Another patent is for a machine that counts the passengers in an omnibus and takes their fares. When a very fat man gets in it counts two and charges double.

There are a variety of guns patented that load themselves; a fish line that adjusts its own bait; and a rat-trap that throws away the rat, and then bait and sets itself and stands in the corner for another.

The truths of the Patent Office are stranger than fiction.

There is a machine also by which a man prints instead of writing his thoughts. It is played on like a piano. And, speaking of pianos, it is estimated that nine thousand are made every year in the United States, giving constant employment to one thousand nine hundred men, and costing over two millions of dollars.

One class of inventions, we are glad to see, meet with deserved reprobation.—Whatever may be said of others, the examiners of the Patent Office are not likely to exaggerate, either from ignorance or design. This is their official judgment respecting "burning fluids."

"There is not much to be accomplished in perfecting artificial light; and it is to be regretted that inventors should be so generally satisfied with attempts on their part to render the use of dangerous materials, popular rather than occupy themselves with the search after something that could be used to supply this want, without endangering the safety of all who participate in its consumption."

"The desire to render the use of highly dangerous fluids less dangerous than they can be when burned in lamps of the ordinary construction has given rise to a few improvements for which patents have been granted. Thus far, however, nothing has been invented which can render these compounds entirely safe; while the frequent and dreadful accidents almost daily recorded from their general use should prompt the public to the use

most care, if not to banish them from all dwellings, as moveable lights, and especially when burned in lamps of fragile materials.—Albany Journal.

LATE FROM EUROPE.

NEW YORK, Saturday, Oct. 30. The Arctic arrived to-day with Liverpool post dates to the 19th.

The Russians refuse to evacuate, and war is inevitable.

Constantinople was quiet.

On the 5th, Gen. Londers with the Russian corps was at Odessa awaiting marching orders.

Prince Gotschokoff, it is rumored, has replied to the Turkish summons, and refuses to evacuate the Danubian principalities.

Gen. Paskowitch has assumed the command of the Russian army in the principalities.

The combined fleets of France and England were preparing to advance to Constantinople.

Austria and Prussia remain neutral.

The Japan expedition returned from Jeddo, August 17th. Com. Perry has had several interviews with the two Imperial Princes. The Commodore delivered the President's letter, and the Japanese and Americans exchanged presents and expressions of friendship.

The strike at Lancaster is alarming; all the mills in Preston are closed, and 25,000 hands are idle.

Constantinople Oct. 6.—The city is tranquil. A part of the Russian army will go into winter quarters at Bucharest.

Odesa Oct. 6.—The Turkish declaration of war has been received. The corps of Gen. Londers is still in this vicinity expecting marching orders.

The greatest confidence prevailed in commercial circles.

The cholera has subsided.

The Times, speaking of the Turkish Manifesto, says that it is one of the strongest and most unanswerable State papers that has been issued during the present century.

The Porte says: "Morally, Russia is already defeated, and that she will be so materially."

Hostilities on the Danube and the shores of the Caspian sea are inevitable. Despatches from Vienna of the 11th say that Prince Gotschokoff has replied to the Turkish summons, and that he has no authority either to commence hostilities, make peace, or evacuate the principalities; he therefore refuses to do either.

The Porte says: "The Turkish declaration of war is published in full. It is a temperate, but high-spirited document, and lays no embargo on Russian ships and fully protects the rights of commerce."

When the Czar heard that Turkey had declared war fell into a fury and swore that he would wage a war of extermination against the Turks.

Omer Pascha has notified the Russian commander to clear out from the Principalities before the 25th inst., or he would commence hostilities.

It is not supposed that the fighting will commence on the Danube, but in Gorgona or the Black Sea.

Old General Paskiwitch takes command of the Russian army in the Principalities.

The combined fleets were observed on the 10th preparing to advance to Constantinople.

There is an invention that picks up pins from a confused heap, turns them all round, with their heads up, and sticks them in papers in regular rows. Another goes through the whole process of cigar making, taking in tobacco leaves and turning out the perfect article.

One machine cuts out cheese; another scores knives and forks; another blades boots; another rocks the cradle; and seven or eight take in washing and ironing.

There is a parlor chair patented that cannot be tipped back on two legs, and a railway chair that can be tipped back in any position without any legs at all.

Another patent is for a machine that loads themselves; a fish line that adjusts its own bait; and a rat-trap that throws away the rat, and then bait and sets itself and stands in the corner for another.

The truths of the Patent Office are stranger than fiction.

There is a machine also by which a man prints instead of writing his thoughts. It is played on like a piano. And, speaking of pianos, it is estimated that nine thousand are made every year in the United States, giving constant employment to one thousand nine hundred men, and costing over two millions of dollars.

One class of inventions, we are glad to see, meet with deserved reprobation.—Whatever may be said of others, the examiners of the Patent Office are not likely to exaggerate, either from ignorance or design. This is their official judgment respecting "burning fluids."

"There is not much to be accomplished in perfecting artificial light; and it is to be regretted that inventors should be so generally satisfied with attempts on their part to render the use of dangerous materials, popular rather than occupy themselves with the search after something that could be used to supply this want, without endangering the safety of all who participate in its consumption."

"The desire to render the use of highly dangerous fluids less dangerous than they can be when burned in lamps of the ordinary construction has given rise to a few improvements for which patents have been granted. Thus far, however, nothing has been invented which can render these compounds entirely safe; while the frequent and dreadful accidents almost daily recorded from their general use should prompt the public to the use

most care, if not to banish them from all dwellings, as moveable lights, and especially when burned in lamps of fragile materials.—Albany Journal.

LATE FROM EUROPE.

NEW YORK, Saturday, Oct. 30. The Arctic arrived to-day with Liverpool post dates to the 19th.

The Russians refuse to evacuate, and war is inevitable.

Constantinople was quiet.

On the 5th, Gen. Londers with the Russian corps was at Odessa awaiting marching orders.

Prince Gotschokoff, it is rumored, has replied to the Turkish summons, and refuses to evacuate the Danubian principalities.

Gen. Paskowitch has assumed the command of the Russian army in the principalities.

The combined fleets of France and England were preparing to advance to Constantinople.

Austria and Prussia remain neutral.

The Japan expedition returned from Jeddo, August 17th. Com. Perry has had several interviews with the two Imperial Princes. The Commodore delivered the President's letter, and the Japanese and Americans exchanged presents and expressions of friendship.

The strike at Lancaster is alarming; all the mills in Preston are closed, and 25,000 hands are idle.

Constantinople Oct. 6.—The city is tranquil. A part of the Russian army will go into winter quarters at Bucharest.

Odesa Oct. 6.—The Turkish declaration of war has been received. The corps of Gen. Londers is still in this vicinity expecting marching orders.

The greatest confidence prevailed in commercial circles.

The cholera has subsided.

The Times, speaking of the Turkish Manifesto, says that it is one of the strongest and most unanswerable State papers that has been issued during the present century.

The Porte says: "Morally, Russia is already defeated, and that she will be so materially."

Hostilities on the Danube and the shores of the Caspian sea are inevitable. Despatches from Vienna of the 11th say that Prince Gotschokoff has replied to the Turkish summons, and that he has no authority either to commence hostilities, make peace, or evacuate the principalities; he therefore refuses to do either.

The Porte says: "The Turkish declaration of war is published in full. It is a temperate, but high-spirited document, and lays no embargo on Russian ships and fully protects the rights of commerce."

When the Czar heard that Turkey had declared war fell into a fury and swore that he would wage a war of extermination against the Turks.

Omer Pascha has notified the Russian commander to clear out from the Principalities before the 25th inst., or he would commence hostilities.

It is not supposed that the fighting will commence on the Danube, but in Gorgona or the Black Sea.

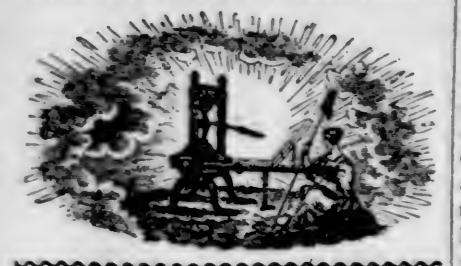

Old General Paskiwitch takes command of the Russian army in the Principalities.

The combined fleets were observed on the 10th preparing to advance to Constantinople.

There is an invention that picks up pins from a confused heap, turns them all round, with their heads up, and sticks them in papers in regular rows. Another goes through the whole process of cigar making, taking in tobacco leaves and turning out the perfect article.

KENTUCKY TRIBUNE

JNO. F. ZIMMERMAN & SON—EDITORS.

Danville, Ky.,
FRIDAY—NOV. 4, 1853.

WOOD, &c.—Those of our patrons who owe us Wood, Flour, Meal, &c., or who have promised to bring us such articles, will do us a great favor, if they will bring them in immediately, particularly the first mentioned article. Fuel. Winter is upon us in earnest, and we cannot get along without good fires.

A PRESENT AS A PRESENT.—We acknowledge the receipt, from Mr. W. E. Breckinridge, of Louisville, of a fine lot of Preserved Peaches, Apricots, Sardines, Fresh Salmon, Pickles, Sauces, etc., etc. Mr. B. is certainly a very discerning gentleman, as well as a very clever one, and has good judgment in the distribution of his presents. Let business men get on the right side of the printer, and, our word for it, they will succeed. This fact is demonstrated in the case of Mr. Burkhardt, who now has the greater portion of the patronage of our business men in his line. He has secured this by advertising, selling none but good articles, and selling them at fair prices. He keeps the largest variety of goods in his line, to be found in the city, and we hope will long continue to enjoy an extensive patronage. Such a man deserves it.

POTATOES.—THE BEST OF THE SEASON.—Mrs. M. J. BARRE, of this place has our thanks for a basket of fine Irish Potatoes—which, both in size and excellence, are far ahead of any we have seen this season.

THE BEET.—We have received from Mrs. ISOM L. VANASDALE, of this county, a large red Beet, which “heads” the one we noticed last week, just one pound in weight—this one weighing 7 pounds.

RROSSETT'S PAINTINGS.—The splendid paintings by Thos. P. Rossiter, Esq., of “The Captive Israelites,” “Return of the Dove to the Ark,” and “Miriam, the Prophetess,” were exhibited in our town before crowded houses several days and nights during the past week. We would not attempt a description of these splendid works of art. We believe they are the finest paintings ever seen in the West, and no one should slight an opportunity to see them.

CONCERN.—We stated a week or two since, that the trial of the Rev. John H. Brown was “deferred,” by the Synod of Kentucky at its recent session in this place. This statement which we made upon the authority of several members of the Synod, we understand is incorrect. The case was referred to a committee, who reported on it; after which, upon motion of Dr. Humphrey, the prosecution against Mr. Brown was dismissed.

SENATORIAL ELECTION.—Rev. Jas. Young, P. G. W. P. of the Grand Division of Kentucky, delivered in our town, on Tuesday night last, one of the best and most effective addresses on the subject of Temperance, we have ever listened to. After the address, a petition for a charter to organize a Division of the Sons of Temperance was signed by a number of our citizens. The total number of petitions at present is 36. The Division will be organized by Dr. Breckinridge, Deputy Grand Worthy Patriarch, as soon as practicable. There is still room for more petitions.

FORUM NEWS.—We publish to another column the latest advices we have from Europe.—There has been no commencement of hostilities between Russia and Turkey, but the reported declaration of war by the latter is confirmed.—The news will be found interesting.

SENATORIAL ELECTION.—The special election for State Senator in the counties of Clarke, Powell, Montgomery and Estill, was held on Monday week. Kohlhass, Whig, and Riddle, Democrat, were the candidates. The Mt. Sterling Whig contains returns, official and reported, from all the counties, which show a majority for Kohlhass of 315.

Since the above was in type we have received the official vote from the Lexington Observer and Reporter:

KohlPass.	Biddle.
Clarke.	328
Montgomery.	299
Estill.	407
Powell.	124
1494	1149
1143	
	345

KohlPass' maj.

Mr. STERLING WHIG.—This excellent paper has been purchased from Mr. Scott by G. E. GREENE, Esq., recently President of the Louisville Typographical Society. Mr. G. is a practical printer, and a good writer. He has our best wishes for his success.

METHODIST COLLEGE AT MT. STERLING.—A meeting was called for the 2d inst. in Mt. Sterling, Ky., to take into consideration the propriety of making an effort to locate a college in that town. This, it is understood, has reference to the contemplated organization of learning by the Kentucky Conference of Methodists.

NOTES ON THE TWENTY-FIVE ARTICLES OF RELATION as received and taught by Methodists in the United States. By Rev. A. J. JONES, M. D., Cincinnati, 1853. 12mo. pp. 407.

We have received from the talented author a copy of the above work, for which he has our thanks. We find it a handsome well-printed volume. Of the style and quality of its contents, it is unnecessary perhaps for us to speak. Dr. Joneson is well known as a man of talent, and that force, clearness, and sound logic which are characteristic of his pulpit efforts, will be fully applied in his writings.

THE NATIONAL MAGAZINE.—We have before us the November number of a periodical bearing the above title. It is embellished with numerous engravings, and in its reading matter presents an agreeable variety of articles on literary, and religious subjects. It is one of the handsomest monthlys we have ever seen. Terms, \$2 per annum. Carlton & Phillips, publishers, New York.

ARTHUR'S HOME MAGAZINE.—This is a book for the home circle—a moral, high-toned interesting monthly, edited by T. S. Arthur, whose writings can always be read with pleasure and profit. Each number is illustrated by one steel and numerous wood engravings. Terms \$2 per annum.

We have received the number for November, but not the one for October. Will Mr. Arthur please send us the latter.

HOGS.—Several thousand head of hogs are to be delivered in Louisville during this and the next month, at \$4 75 net. The Journal of Tuesday says the prevailing rates are \$4 75 and \$5 net—the former being offered and the latter asked. Jackson, Hull & Co., commenced slaughtering on Monday.

The telegraph reports 600 head sold at Cincinnati, at \$5 25, but a later despatch reports hogs at \$5, with more sellers than buyers.

ANOTHER COMET.—According to an English paper, another comet is taking a tour through the heavens, within the scope of our earthly vision. It was discovered at Berlin, on the 11th of September, and on the 15th of October was visible to the eye. The head equalled in brightness a star of the fourth magnitude, and the tail could be traced about one degree. It had a rapid southerly motion.

HON. J. F. BELL.

The following high and well-deserved compliment to our distinguished fellow-citizen, Hon. J. F. Bell, we copy from that sterling paper, the Frankfort Commonwealth. Wherever Mr. B. is known, the sentiment of this brief paragraph will be endorsed. He is a favorite, and has made himself so, not by the tricks which are characteristic of low electioneering, but by his unscrewing devotion to principle and right, his dignified independence, his pride of character, and all those qualities of a true man, which entitle one to the respect and esteem of his fellow-citizens. We have seen him in public and in private life, and more creditably fit any station within the gift of the people or their representatives. Nothing can truthfully be said against his political or social character. Though many may differ with him in opinion, in regard to State or National policy, his honesty is unquestioned—he has never sought the popular current, at the sacrifice of his honest convictions. The coming Legislature will have before it the name of no one who can confer more credit upon our State in the U. S. Senate, than the Hon. Joshua F. Bell.

THE DANVILLE TRIBUNE suggests the name of John C. F. Bell for the United States Senator. It could not suggest the name of a man of nobler soul, purer character, or finer talents. We may say of him as Judge Baldwin said of John Sergeant: “There's no position in government, high or low, that he would not fill to overflowing.”

THE RAILROAD

A number of railroad companies in different parts of the country have been compelled to suspend operation on their respective lines, in consequence of the state of the Eastern money market, and the difficulty of negotiating loans upon their bonds. A report has obtained circulation, that the work on some parts of the Lexington and Danville Railroad has also been stopped. We are authorized to say that this report is incorrect. The work is still progressing. A large force is employed on both ends of the road, and at other points on the line pushing it forward to early completion. In order to keep up the work, however, it is absolutely necessary and important that stockholders should promptly pay their subscriptions. If this is done, there need be little fear of any suspension of the work. If not, it may become necessary to wait for a change in the money market, and until those who have subscribed stock fulfil their contract by paying up.

THE JAPAN EXPEDITION.—A late arrival from Europe brings the information that Commodore Perry's squadron has reached Japan, and was well received. Negotiations have been postponed until spring.

37 One hundred young men have left Richland, Mo., for Kentucky, where they intend to cut timber and build vessels. This is a new enterprise, and with the bone, sinew, and go-aheadness of Maine mechanics, it cannot but succeed. More mechanics will follow soon. The vessels built will be floated down the Ohio and Mississippi rivers.

THE LEGISLATURE OF VERMONT has elected John B. Campbell, (democrat) Governor, by a large majority.

37 A despatch from New Orleans, dated October 29, says that the weather is clear and frosty, and that the health of the city is completely restored. There is great anxiety to hear of a rise in the Ohio.

37 Dr. Trundell, who was arrested some weeks ago in Boone county, for stealing negroes and sending them to the southern market, has taken a change of venue to Kenton county. The trial will come off at Independence in December next. It will be recollected that his bail was fixed at the high sum of \$17,000; it has been reduced to \$11,000, in default of which he is still in prison.

THE BIRMING WOODS.—The Detroit Democrat says: Last night about dark it commenced raining; and kept it up slowly, but surely, all night. Our streets are pretty thoroughly drenched, and the fires in the woods must be this time nearly extinguished. This will be glorious relief to the farming community in this vicinity.

37 Europe is just now threatened with the cholera and a scarcity of bread, and if war be superadded by man to these scourges of God, the record of the coming year will form one of the most horrible chapters in modern history.

A WARNING TO BOYS.—Moses and Robert Kelly, brothers, were executed at Hawesville, Ky., on Friday last, for the murder of Gordiner, Miller and Holton on the flatboat Eliza, No. 2, near Troy, Indiana, last fall. They confessed their crime, and warned the young men present “to flee from bad company.” Moses remarked that “drinking, gambling and indolent companions had placed him where he was.”

37 Col. D. S. Goodloe, of Lexington, has been elected Major General of the 5th Division Kentucky Militia.

MR. STERLING WHIG.—This excellent paper has been purchased from Mr. Scott by G. E. GREENE, Esq., recently President of the Louisville Typographical Society. Mr. G. is a practical printer, and a good writer. He has our best wishes for his success.

THE CRAB ORCHARD FAIR.—We publish this week a complete list of the premiums awarded at the Crab Orchard Fair held last week. The weather during the whole exhibition was exceedingly unfavorable but notwithstanding this fact, the exhibition in each department was interesting. We had not the pleasure of being present ourselves, as was our wish, and regret our inability to give anything like an account of each day's proceedings.

NOTES ON THE TWENTY-FIVE ARTICLES OF RELATION as received and taught by Methodists in the United States. By Rev. A. J. JONES, M. D., Cincinnati, 1853. 12mo. pp. 407.

We have received from the talented author a copy of the above work, for which he has our thanks. We find it a handsome well-printed volume. Of the style and quality of its contents, it is unnecessary perhaps for us to speak. Dr. Joneson is well known as a man of talent, and that force, clearness, and sound logic which are characteristic of his pulpit efforts, will be fully applied in his writings.

THE NATIONAL MAGAZINE.—We have before us the November number of a periodical bearing the above title. It is embellished with numerous engravings, and in its reading matter presents an agreeable variety of articles on literary, and religious subjects. It is one of the handsomest monthlys we have ever seen. Terms, \$2 per annum. Carlton & Phillips, publishers, New York.

ARTHUR'S HOME MAGAZINE.—This is a book for the home circle—a moral, high-toned interesting monthly, edited by T. S. Arthur, whose writings can always be read with pleasure and profit. Each number is illustrated by one steel and numerous wood engravings. Terms \$2 per annum.

We have received the number for November, but not the one for October. Will Mr. Arthur please send us the latter.

THE COTTON CROP.—The New Orleans Picayune says the sugar crop of Louisiana will not be inferior, either in quantity or quality, to what it was in either of the last two years. Sugar planters in various parts of the State have commenced grinding.

37 The cotton crop in several sections South has been very severely injured by the late frost.

TENNESSEE U. S. SENATOR.—Hon. John Bell has been re-elected to the Senate of the United States by the Legislature of Tennessee for six years from the 4th of March, when his present term expires.

ANOTHER COMET.—According to an English paper, another comet is taking a tour through the heavens, within the scope of our earthly vision. It was discovered at Berlin, on the 11th of September, and on the 15th of October was visible to the eye. The head equalled in brightness a star of the fourth magnitude, and the tail could be traced about one degree. It had a rapid southerly motion.

The telegraph reports 600 head sold at Cincinnati, at \$5 25, but a later despatch reports hogs at \$5, with more sellers than buyers.

THE MONEY MARKET.—The New York papers report the money market as decidedly easier.

It was said to be much less difficult in negotiating loans upon good paper than for something past. First class paper is quoted at 12@15 per cent. Call loans 7 per cent. The stock market

INSTITUTION FOR THE DEAF AND DUMB.

We learn that the present session of this institution has opened with sixty-five pupils, (a larger number than has been in the institution at any former period,) with the prospect of an additional number. THERE ARE OVER FOUR HUNDRED UNEDUCATED MUTES IN KENTUCKY. The number of pupils in the institution has been gradually increasing from year to year, and will no doubt continue to do so, until the annual number is sufficient to educate all the mutes of the State, susceptible of education.

This increase of pupils will require an enlargement of a portion of the buildings, and we learn that an application will be made to the next Legislature to effect this object. Without such an enlargement, the present number cannot be received.

We hope that an appropriation as large as may be needed, will be granted. It is the

will of the Louisville Democrat of Monday says: The Hon. A. Dixon, United States Senator, was married on Saturday last to Miss Susan Bell, daughter of Wm. C. Bell, Esq., of this county. We observed that Gov. Powell was on hand to attend the nuptials of his old friend, partner and competitor for the office of executive of this commonwealth.

Such an example ought not to be lost upon

THE DAYTON (Ohio) ITEM, says that Mr. Degriff, the railroad contractor, has discharged a large number of his hands in consequence of the state of the money market.

LIST OF PREMIUMS

AWARDED AT THE FIRST ANNUAL FAIR
AT CRAB ORCHARD, KY.,
ON THE 26TH, 27TH AND 28TH OF OCTOBER, 1853.

FIRST DAY.

Fine Jeans, 2 entries, Mrs. James Crow, Lincoln, premium; Mrs. Walter Owles, Lincoln, cer. White Flannel, Mrs. M. E. McAlister, Lincoln, premium.

Linsey, 2 entries, Mrs. James Crow, Lincoln, premium.

Pair Blankets, 4 entries, Mrs. E. Gregg, Lincoln, premium; Mrs. W. C. Montgomery, Lincoln, cer. Rag Carpet, 6 entries, Mrs. Walter Owles, Lincoln, premium; Mrs. Ann Nelson, Lincoln, cer. Woolen Carpet, 3 entries, Mrs. John Owles, Lincoln, premium; Mrs. A. McRoberts, Lincoln, cer. Half Horse, 2 entries, Mrs. E. Gregg, Lincoln, premium; Mrs. E. M. Sanders, Lincoln, cer. Rifles, Shot-Guns and Pistols.

PREPARING, done in a neat and workmanlike manner, and on the shortest notice.

Danville, Aug. 12, '53 if

DR. CHOCHEGAN'S Extract of Hydropiper, A CURE FOR

Dyspepsia, Scrofula & Skin Diseases.

DR. CHOCHEGAN, a graduate of the University of Louisville, and a practitioner of homoeopathy, after many years' hard study and numerous experiments, has succeeded in obtaining an essential property from the Hydropiper, which, combined with other Vegetable ingredients, set forth in his published recipe, forms a most valuable and efficacious Remedy for many Chronic Diseases. Unlike Sarsaparilla, it is quick in action, the first application producing won'erful results, as in the case of the negro girl of Mrs. Simmons, of Louisville, of Blindness in One Week. This is no humbug, no catch-penny, neither is it a nostrum, as

Prescribed by Physicians.

From the numerous testimonials from the first citizens and Physicians of Kentucky. In short, it has excited the wonder and admiration of all who used it, and it now stands at the head of all Remedies in the cure of the following Diseases:—Dyspepsia, Scrofula or King's Evil, white swelling, Pimples, Tumors, Ich, Tetter, Ulcers, Ulcerous Exanthem, White Rash, Relief of Scrophulosis, all Erptions of the Skin, Rheumatism, Neuralgia, Gout, Hip Disease, all Kidney Diseases, Seminal Emotions, all Uterine Diseases, Liver Disease, Sick Headache, Sour Stomach, Night Sweats, water Brash, Heart Burn, Negro Consumption, and as a general Tonic and Purifier of the Blood, it has no equal.

The Agents are in possession of testimonials (which may be seen at any time) from men holding the highest offices in the country. The effects are to call and get a circular.

DR. CHOCHEGAN & PATTEN, Sales Agents, To whom all orders for Hydropiper or Agents should be addressed.

DR. CHOCHEGAN'S Extract of Hydropiper is evident from the fact of its being

Prescribed by Physicians.

From the numerous testimonials from the first citizens and Physicians of Kentucky.
